The professor, Sanford PC Hsu, M.D., founded "The Lectures and Hands-on Cadaver Dissection Course for Cerebrovascular Microneurosurgery" in 2004 after joining Advanced Cerebrovascular Course developed and instructed by Ali F. Krisht, M.D. at St. Louis, USA. Dr. Ali F. Krisht perfectly delivered and demonstrated the concepts and techniques in microneurosurgery from Professor M. Gazi Yasargil, who has been honored as the "Neurosurgery's Man of the Century, 1950-1999".

Shortly after Dr. Ali F. Krisht was invited to Taiwan for a speech on March 2005, Dr. Sanford PC Hsu proposed to Dr. Ali F. Krisht to develop the very same "Advanced Cerebrovascular Course" in Taiwan. By transferring successful factors and experiences from the course in St. Louis, Dr. Sanford PC Hsu is confident that local and international neurosurgical professionals will obtain valuable knowledge and further strengthen their skills through direct hands-on experiences with latest techniques and the state-of-the-art equipment in neurosurgery.

Since the first event held in National Yang-Ming University, Taiwan on November 2005, Dr. Sanford PC Hsu has accumulated numerous positive feedbacks and experiences. The "Advanced Cerebrovascular course" in Taiwan has become one of the most recommended and well acknowledged courses by both local and international neurosurgical professionals over the past 16 years. Dr. Sanford PC Hsu is confident that with the guidance and experiences delivered from Dr. Ali F. Krisht along with all distinguished key opinion leaders invited to this event, the course will definitely and continuously lead us to achieving an even broader spectrum of innovative thinking and knowledge sharing in Neurosurgery.

"We are always striving for the best. By integrating additional resources from other collaborators and business partners, we aim to promote this event to the world and we hope this event can eventually be the "must-attend" international course in Taiwan."

Sanford PC Hsu, M.D
